

TelAbortion

Safe. Effective. Private. Convenient.

A direct-to-patient model, providing medication abortion through telemedicine

You can qualify if:

- You are pregnant and want a medication abortion
- You live in New York, Colorado, Georgia, New Mexico, Hawaii, Oregon, Washington State, or Maine.
- You have access to a device with internet connection, a webcam, and a microphone
- You are able to have the necessary pre-abortion tests, receive the medication, and take the first abortion pill before you are 70 days (10 weeks) along in your pregnancy
- You **DO NOT** have-
 - 1) an IUD
 - 2) any problems with your adrenal glands
 - 3) Any condition that affects the ability of your blood to clot normally
 - 4) Inherited porphyria (a genetic blood disease)
 - 5) an allergy to the abortion drugs
 - 6) you are not using any anticoagulants or steroids
